Tour Leader

Nick Bonomo

Nick has been birding New England since the age of 16. He graduated from Stonehill College with a degree in Biology in 2006. In 2007, he began attending Yale University from which he graduated as a Physician Assistant. Despite his rigorous career schedule, Nick has escaped to bird such locations as Nova Scotia, Florida, Texas, Arizona, Costa Rica, eastern Australia, Brazil, Ecuador, Japan, and New Zealand. He currently lives in Connecticut and can often be found birding the New Haven County coast in his spare time. His interest in bird identification, status, and distribution makes him a skillful leader, and his enthusiasm is matched by few.

Stunning Sights!

Embark on a journey with Connecticut Audubon Society that will bring you to some of the most famous destinations on Earth. Enjoy hundreds of birds and the many large mammal species that call Africa home, all while enjoying comfortable accommodations and transportation.

The trip will begin in Zambia, where travelers will visit one of the most famous waterfalls in the world: Victoria Falls. Time will also be spent exploring the beautiful woodlands that surround the Zambezi River, in search of stunning species such as the African Emerald Cuckoo and African Finfoot. Next, travelers will head to the home of some of the world’s most endangered mammals: the Okavango Delta.

This delta in northwest Botswana comprises permanent marshlands and seasonally flooded plains. It is one of the very few major interior delta systems that do not flow into a sea or ocean, with a wetland system that is almost intact. One of the unique characteristics of the site is that the annual flooding from the Okavango River occurs during the dry season, with the result that the native plants and animals have synchronized their biological cycles with these seasonal rains and floods. It is an exceptional example of the interaction between climatic, hydrological, and biological processes. Some of the endangered species of large mammals that call this delta home are, the Cheetah, White Rhinoceros, Black Rhinoceros, African Wild Dog, and Lion.

Finally, travelers will visit Namibia, where time will be spent exploring the coastal habitats in search of more new and exciting species. Some time will also be spent searching for the Dune Lark, Namibia’s only truly endemic species!

Will you join us on this African safari, and experience the sights and sounds of sub-Saharan Africa? We hope so!

General Information

Main Tour Cost: $6,598. With Member Discount: $5,898. Single Room Supplement: $360. Single rooms may be available but are not guaranteed at all locations.

Prices are based upon a minimum number of six paying participants traveling together.
