Maine: Whales and Puffins

July 9 - 13, 2020
Acadia National Park was proclaimed as a national monument in 1916 and established as a national park in 1919. The park includes a rugged coastal region of great natural beauty and Cadillac Mountain. It consists of half of Mount Desert Island, parts of Isle au Haut, and several other islets, as well as the tip of the Schoodic Peninsula, the only mainland section. The coast is characterized by wave-eroded granite cliffs. The inland portion, forested with spruce and fir, contains lakes and mountains carved by glacial action. A variety of land and marine life is found in the park.

Join EcoTravel as we explore Acadia and Mt. Desert Island in search of Atlantic Puffins, Humpback Whales, and other unique coastal and boreal species that can be found in Downeast Maine. Enjoy sunrise at the top of Cadillac Mountain, spruce bog habitats, and of course historic Bar Harbor! Keep you eyes peeled for the rare and unexpected, as you never know what’ll appear while exploring!

Matt Bell is a recent graduate from The Ohio State University with BS degrees in both earth sciences and evolution/ecology. Matt started birding in May 2013 and became more seriously involved after a trip to Costa Rica. Since then he helped revive The Ornithology Club at Ohio State and assisted as a volunteer guide for The Biggest Week in American Birding and the Yellow Rails and Rice Festival. He absolutely loves participating in citizen science, tour guiding, chasing rare birds in his free time, and meeting fellow birders from around the globe. Most of all, Matt enjoys sharing his passion for birds and conservation with others and never shies away from taking the time to help beginners start their explorations of the avian world. Matt is the EcoTravel travel specialist and leads day trips and overnight tours.

General Information
Fee: $2,098.  
With Member Discount: $1,798.  
Single Supplement $500.

Pricing is based on a minimum of six participants. With fewer, a small group supplement may apply.
