Co-Leader: ___________________________
Theme walk name: ______________________
Trails / Loop: _________________________
Begin time: ____________End time: ____________
Temperature: _____
Weather Conditions:  ____________________

Total bird species observed: _____
Total participants: _____

Thank you for reporting your bird observations to our eBird Hotspot locations:
Deer Pond Farm, CT Audubon (Fairfield County) Sherman to use on CT trails
Deer Pond Farm, CT Audubon (Dutchess Co.) to use on NY trails.

Deer Pond Farm is comprised of 835-acres of contiguous upland forest. The predominant habitat is mature deciduous forest with interspersed meadows, streams, vernal pools and intermittent streams.

This is a prime birding area, especially during the spring and fall migrations.

With a well maintained trail network, the diverse habitats and terrain can be easily explored year-round.

There are numerous historic stonewalls and foundations to be enjoyed throughout the property.
