EcoTravel COVID-19 Protocols

- Each vehicle undergoes enhanced cleaning before each Day Trip and every day during Overnight Tours.
- Vehicles are equipped with hand sanitizer. Travelers are encouraged to bring their own supply for use outside the van.
- All participants have their temperature checked with a forehead thermometer before initial boarding of the vehicle. Travelers with an elevated temperature (100.4 and above) will not be allowed to enter the van.
- While in the vehicle, all travelers are required to wear masks.
- Masks are required in any situation outside the van where social distancing is not possible.
- When boarding the vehicle, travelers board back-to-front. The reverse applies when exiting the vehicle.
- In the event that a trip includes a stop for meals, all efforts are made to enjoy the meal outside. If a meal can't occur outside, masks and proper social distancing are required while indoors.
- Travelers are requested to self-quarantine for fourteen days before Overnight departures.
- Travelers falling ill during the trip will have to depart and quarantine at their own expense. Travel insurance covering such is strongly suggested.
